

Session 1:

1. What is a Program?

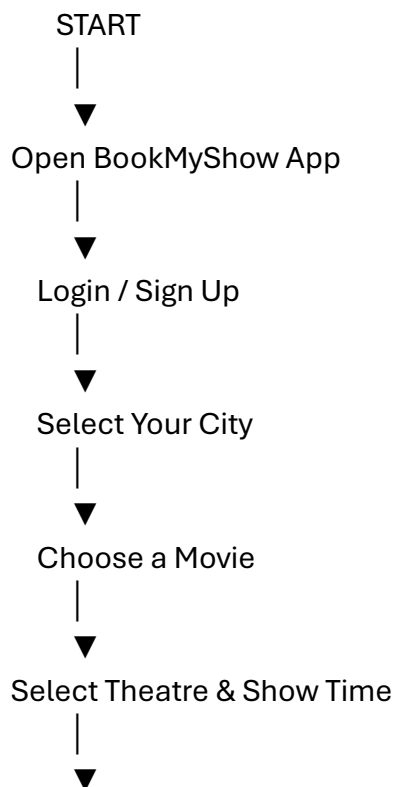

A **program** is a set of instructions written in a programming language that tells a computer how to perform a specific task. Programs help us use different applications and make our daily activities easier. For example, in **Instagram**, a program allows users to log in, view posts, upload photos, like and comment on posts, and send messages.

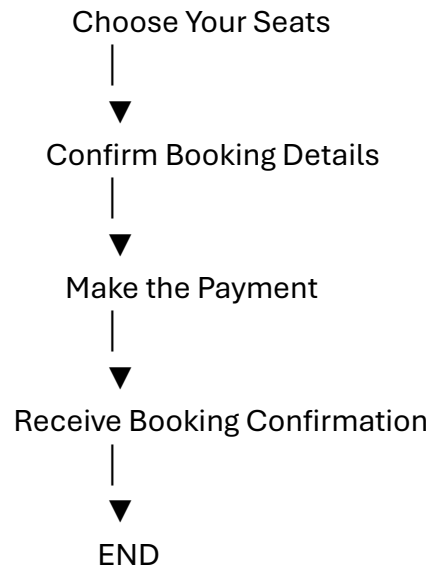

2. Three Popular Programming Languages

Programming Language Type

Java	Compiled
Python	Interpreted
JavaScript	Both (Interpreted and Just-In-Time Compiled)

3. Flowchart for Booking a Movie Ticket on BookMyShow

4. Algorithm for Ordering Food on Swiggy
